## PROFILE

I am a young software engineer who is currently working in his first industry role. Having worked with a variety of programming languages since taking up this profession, I like to believe that the best tool in my closet is my adaptability. I have a passion for learning new technologies and believe with the right training I can pick up any language or technology stack. In my personal time I enjoy hiking, weightlifting, all types of travel plus learning new programming skills - of which Laravel and VueJS are the latest goals.

## EDUCATION

### ❖ MSc Software Development - Queens University Belfast

- Graduation - September 2020

#### Modules undertaken:

- Programming (Java)
- Computing Foundations
- Databases (SQL)
- Web Development
- Software Engineering
- Individual Final Project

### ❖ BSc Criminology - University of Chester

- 09/13 - 07/16

### ❖ A Levels grade A\* - C

- ICT
- General Studies
- Psychology
- Physical Education

### ❖ 12 A\* - C GCSEs including Maths and English

## TECHNICAL SKILLS

- ❖ Java, Android
- ❖ PHP
- ❖ HTML5, CSS3, Bootstrap
- ❖ MySQL
- ❖ JavaScript, JQuery
- ❖ Git, Linux

## EXPERIENCE

### Eden E-commerce - 2020 - Present

- ❖ PHP web development using a LAMP stack
- ❖ Development and maintenance of E-commerce website and internal web application systems
- ❖ Exposure to commercial use of Docker, Linux, Test Driven Development, Git, OOP
- ❖ Worked directly under the founder of the company to apply software development principles to create effective business solutions

### International Experience - 2017-2019

- ❖ Lived, worked and travelled throughout Australia, New Zealand and South East Asia.
- ❖ Developed a plethora of soft skills including time management, communication, organisation and most importantly, adaptability.
- ❖ Worked multiple customer facing positions whilst abroad which exposed me to many different types of personalities and cultures. These roles have allowed me to develop my interpersonal skillset whilst building well rounded relationships with clients from a variety of backgrounds.

## PERSONAL PROJECTS

### ❖ ChefMate

- ❖ A recipe generator and food logging system designed to help users keep track of the foods they need for their personal goals and recipes that they particularly enjoy. This is being built with Laravel and VueJS.

### ❖ Gymafi

- ❖ Built a functional personal training website using HTML5, CSS3, JQuery, PHP and SQL stack that acts as an interface between a personal trainer and their clients.

### ❖ Calma

- ❖ Created an Android app written in Java that acts as a personal safety net for vulnerable people. It allows a vulnerable person to be matched with a trusted contact (e.g. a person with a disability and their carer) and will track their location and provide other analytics to help them in their time of need, depending on which "severity button" the vulnerable person uses.
